Unit 3 / Lesson 2 / Assignment 6

Build the Middle Sections: Challenge

Now that you have your header completed, take 1 hour to try building the three middle sections of content (**Introduction**, **Where I'm From**, and **More About Me**). Don't peek at the finished version of the project!

Similar to the first challenge, if you get stuck, first try seeking out help from your colleagues via the student community or by digging into popular online forums like StackOverflow and CSS Tricks. Communicating problems to others is an essential skill for developers.

Just to make sure you're starting off in the right place, your current Codepen HTML and CSS should look like this:

```
<header class="masthead">
  <p class="masthead-intro">Hi, I'm</p>
  <h1 class="masthead-heading">Name!</h1>
</header>
<section>
</section>
<section>
</section>
<section>
</section>
<footer>
</footer>
```

```
.masthead-heading,  
.masthead-intro {  
  text-align: center;  
}  
  
.masthead {  
  padding: 6em 0;  
  background-image: url('http://i.imgur.com/lvXbgcg.jpg');  
  background-repeat: no-repeat;  
  background-size: cover;  
  border-top: solid 1em #FFCF33;  
}  
  
.masthead-intro {  
  margin-bottom: 0.1em;  
}  
  
.masthead-heading {  
  margin-top: -0.2em;  
}
```

Stick with it for the full hour -- solving problems you encounter will help you internalize your new coding skills. Once the hour is up, jump right back into our lessons where you will find a step by step tutorial. Good luck!
